Dear all –

I am not certain if anyone other than Erin is aware of this, so just in case, I felt I should forward this to you. See below.

Cheers,

Rainer

Subject: IEP Tidal Wetland Monitoring Project Work Team

All,

You are cordially invited to attend the first meeting of the new IEP Tidal Wetland Monitoring Project Work Team. I currently supervise the DFW Fish Restoration Program (FRP) monitoring program in Stockton and have been tasked with establishing this new technical team, to meet the need for a coordinated effort to design a system-wide standard monitoring program for tidal wetlands in the Delta and Suisun Marsh. The team will focus on the monitoring of fish and foodweb resources, including phytoplankton and zooplankton.

Attached is the proposal to form the work team, along with ground rules and the team mission.

I propose our first meeting on:

June 25, 9:00 – 12:00

DWR DES Office, Room 119

West Sacramento

Just a warning - this team will not be for the faint-of-heart. Unlike some other IEP teams, our emphasis will not only be on information exchange, but will actually include some real work, developing a standardized monitoring plan for tidal wetlands. My staff will be available to prepare the plan, but team members will need to provide ideas and direction for the plan. We will probably have monthly meetings.

Our tasks will probably follow this order:

- Develop conceptual models for ecological function of tidal wetlands,i
- Develop protocols for food chain monitoring:
 - o Primary productivity (detritus, chlorophyll a, phytoplankton)
 - o Secondary productivity (zooplankton, benthic invertebrates)
- Develop protocols for fish monitoring

Please let me know your interest in this team and if the above meeting date works. If there are other colleagues who want to be involved, please send me their contact information. If you are interested in getting off this email list, please let me know that too. Looking forward to working with you.

Alice F. Low

Program Manager, Bay Delta Region

Tidal Wetlands Monitoring Program

California Department of Fish and Wildlife

2109 Arch Airport Road, Suite 100
